BULLETIN NO. 36 OF 1971

To be treated as strictly CONFIDENTIAL and NOT to be published, broadcast, or cabled before 6 p.m. on Thursday, 13 May 1971

RETAIL PRICES, MARCH QUARTER 1971

12 MAY 1971

Introduction

The Consumer Price Index measures quarterly, for each State Capital, the variations in prices of commodities and services which affect a high proportion of the expenditure of wage-earner households. Commodities and services included in the index are food, clothing, drapery, home ownership, rent of houses and flats, fuel, light, furniture, household appliances and supplies, fares, motoring, tobacco, cigarettes, beer, cinema, radio and television licences, newspapers, postal and telephone services, hairdressing, dry cleaning, medical and health services, and various other items.

The various commodities and services have been combined into groups, and group indexes are available for Food, Clothing and Drapery, Housing, Household Supplies and Equipment, and Miscellaneous.

The indexes measure price movements in each city individually. They do not provide a comparison of the retail price level in any city with the retail price level of any other city. The base of the index for each city and for the weighted average, six State Capitals, is 1966-67 = 100.0.

All Groups

There was an increase of 1.6 per cent in the Brisbane Consumer Price Index from December quarter 1970 to March quarter 1971, the index number for All Groups rising from 113.3 to 115.1. For the twelve months ended March 1971 the All Groups increase was 5.7 per cent.

During the quarter under review, the Index increased in all State Capitals, the percentage increases being: Brisbane, 1.6; Perth, 1.1; Sydney, Melbourne, and Adelaide, 1.0; Hobart, 0.7; and the weighted average for the six State Capitals, 1.1.

Since the base year, 1966-67, the rise in the retail price level has been greatest in Sydney and smallest in Adelaide. Percentage increases for the various State Capitals from 1966-67 to March quarter 1971 were as follows: Sydney, 17.4; Brisbane, 15.1; Perth, 14.8; Melbourne, 13.7; Hobart, 13.2; and Adelaide, 12.9. The rise in the weighted average for the six State Capitals was 15.2 per cent. (It should be noted that these figures merely indicate rates of price rises in separate cities and do not represent in any way the relativities of actual price levels in the different cities.)

A brief outline of the movements of the various group indexes for Brisbane between December quarter 1970 and March quarter 1971 is given below.

Food Group

The Food Group index increased from 112.8 to 113.9, a rise during the quarter of 1.0 per cent. The main price increases recorded were for fresh meat, processed meats, and cereal products.

Clothing and Drapery Group

Higher prices of footwear were chiefly responsible for the rise of 1.1 per cent in the Clothing and Drapery Group, the index rising from 110.9 to 112.1.

### Housing Group

The increase of 1.8 per cent in the Housing Group index, from 116.8 to 118.9, was due mainly to rises in private house and flat rents, and in prices of items used in repairs and maintenance.

### Household Supplies and Equipment Group

The Household Supplies and Equipment Group index increased by 1.6 per cent, from 107.5 to 109.2, because of price changes in household appliances and furniture, and in proprietary medicines.

### Miscellaneous Group

The Miscellaneous Group index rose from 116.6 to 119.5, an increase of 2.5 per cent. The rise was chiefly attributable to increases in prices of beer and private motoring items.
